

# Yeahia Sarker

Software Engineer • Artificial Intelligence

✉ yeahia.ruet@gmail.com

☎ +8801305691838

📍 Dhaka, Bangladesh

## Technical Skills

---

- *Programming Language* : Bash, Python, Rust, C/C++
- *FrontEnd* : HTML, CSS, SCSS, ReactJS, NextJS, Typescript, TailwindCSS, Material UI
- *Backend* : Django, FastAPI, Flask, Motor, Apache, Nginx, Sterk
- *Data Tools* : Redis, Memcached, Hadoop, Spark, Polars, Kafka, MySQL, MongoDB, InfluxDB, PostgreSQL
- *Machine Learning* : Pandas, Scikit-Learn, Huggingface, Replicate, Tensorflow, Pytorch, Keras, Jax
- *Agentic Frameworks* : Langchain, Llama Index, Langgraph, Langfuse, Langsmith, DeepEval
- *Cloud (AWS)* : EC2, S3, Bedrock, Lambda, EKS, ECS, Sagemaker, Cloudfront, Cloudwatch, Route 53
- *Linux* : Ubuntu, Debian, Arch, Gentoo, LFS, Firewall, DNS, Socket Programming, Network Management
- *Security Tools* : Nmap, TCPDump, Wireshark, Metasploit, Netcat, ExploitDB, Hydra, Ettercap
- *DevOps* : CDN, Docker, Kubernetes, Helm, Terraform, Jenkins, Github Actions, SSH, Horovod, Mlflow

## Professional Experience

---

Myalice.AI

Head of Artificial Intelligence

📍 Dhaka, Bangladesh

📅 April 2024 – Present

Technologies : AWS, Huggingface, Docker, Kubernetes, Langchain, Llamaindex, NextJs, FastAPI, MongoDB, Jira

- Deployed arabic large language models in production for restaurant and food-delivery companies in order to perform customer query.
- Utilized best practices such as containerization, microservices architecture, and API gateway to ensure security, reliability, and maintainability of the system.
- Architected and lead the technical team to deliver a fault tolerant, scalable, and chatbot customer service completely on AWS.

---

Humufy.AI

Founder

📍 Dhaka, Bangladesh

📅 January 2024 – Present

Technologies : AWS, Replicate, ECS, EKS, Webassembly, Docker, Nginx, NextJs, FastAPI, MongoDB

- Led the development of an AI-powered product photography solution for e-commerce, delivering an end-to-end product.
- Implemented a Kubernetes-based scalable architecture to streamline and automate background removal in product images.
- Achieved an 80% cost reduction by optimizing AI image generation through serverless architecture.

---

Anchorblock.AI

SVP, Machine Learning

📍 Dhaka, Bangladesh

📅 April 2022 – March 2024

Technologies : AWS, Polars, Spark, Pytorch, OpenCV, Terraform, Nginx, InfluxDB, MongoDB, PostgreSQL

- Led a team to develop a Bangla grammar correction service utilizing token-based and sequential models for enhanced language accuracy.
- Contributed to the development of an auto-completion feature for accounting software, tailored specifically for the SME sector.
- Established strategic partnerships with key industry leaders in the field of deep learning and secured significant funding for startup ventures.

Harvard Medical School

Research Intern

📍 Cambridge, United States

📅 March 2021 – May 2021

Technologies : Tensorflow, Javascript

- Initiated and developed a tele-medicine project developing an eye-region detection system using pre-trained weights.
- Developed an cross-platform desktop application showcasing the potential impact of the eye-misalignment project.

---

Stanford University

**Research Intern**

📍 California, United States

📅 December 2020 – February 2021

Technologies : Pytorch

- Demonstrated strong technical writing skills, authoring 3 journal papers on research findings, with an average citation count of 30 per paper.
- Mentored and guided 4 research projects that resulted in conference publications and the submission of a US patent application.

---

Bugfixers.Net

**Senior Machine Learning Developer**

📍 Dhaka, Bangladesh

📅 November 2019 – November 2020

Technologies : AWS, OpenCV, Redis, Apache, Nginx, ReactJS, ElectronJS, Flask, MySQL, Unittest

- Spearheaded the successful deployment of a large scale facial recognition system, leading the machine learning team from ideation to production.
- Mentored and managed a team of talented engineers, providing technical guidance and fostering a culture of innovation and excellence.
- Conducted code reviews, provided technical guidance, and mentored team members to achieve a high-performance culture.

---

Control System Research Lab

**Research Assistant**

📍 Dhaka, Bangladesh

📅 January, 2019 – October 2019

Technologies : Tensorflow, Keras, Pytorch, OpenCV, Latex, Libreoffice

- Mentored novice researchers in order to learn about research methodology, ablative analysis, research ethics, end-to-end research pipelines.
- Conducted extensive research and analysis to identify gaps and opportunities in existing fault detection approaches, leading to the creation of a novel neural network architecture that outperformed traditional techniques.

---

Gaze.AI

**Deep Learning Intern**

📍 Dhaka, Bangladesh

📅 May 2019 – June 2019

Technologies : Tensorflow, ONNX

- Acquired hands-on-experience in face recognition models and learned how loss functions work for face recognition networks.
- Converted pytorch models to tensorflow models & vice-versa using ONNX in order to reduce model size for faster inference.

## Education

---

BSc in Mechatronics Engineering

📅 2016 - 2019

Rajshahi University of Engineering & Technology

## Awards

---

**Innovation Award - Anchorblock Technology**

📅 April 2023

Received company *Innovation Award* for building an automated system that optimized production workflows, reducing operational costs by 25%
